I am a Computer Engineering diploma graduate with Python expertise, proficient in Flask, HTML, CSS, JS, React.JS, NumPy, Pandas, Tkinter. Experienced in software development and practical projects.. My goal is to leverage my technical skills to develop innovative software solutions and grow within the field of software and Web development.

Skills

- Python (**ADVANCED**)
- Application Design (Tkinter, KivyMD)
- Flask Framework (INTERMEDIATE)
- WebScrapping (Selenium, bs4)

- HTML, CSS, JS (**INTERMEDIATE**)
- React.js And Next.js (**INTERMEDIATE**)
- SQLite, MySQL, MongoDB, Firebase
- Problem-solving

Education

- **Saraswati Insitute Of Technology, Kharghar**   *2024*
  - Diploma in Computer Engineering
  - Grade : First Class Distinction

Work Experience

- **Pinnacle Classes - Python Technology**   *Jul 2023 - Aug 2023*
  - Hands-on software development experience: coding, debugging, testing, deployment
  - Completed internship with commendation for project quality

- **Technical VPN - Web Development Intern (5 months)**   *Aug 2024*
  - Developed and managed APIs using Flask for web applications, ensuring fast and efficient communication between client and server.
  - Implemented web scraping solutions using libraries like Selenium and BeautifulSoup to extract and process data from various websites.

- **TechVyaasa - Android Developer (Current Job)**   *Sept 2024*
  - Worked on building cross-platform mobile applications using Flutter.
  - Integrated APIs and ensured smooth communication between mobile apps and back-end services.
  - Collaborated in an agile team for delivering client-facing features in Android apps using Kivy.

Projects

- [TODO-List Web Application](#)
  - Responsive CRUD app with light/dark mode, GitHub Pages deployment.   *July 2024*
- [Accident Detection System](#)
  - Monitors phone accelerometer, sends SMS alerts on detection.   *Aug 2023 - Feb 2024*
- **Quiz Web Application**
  - Built quiz app with Flask and AWS MySQL, featuring session handling.   *May 2024*
